Great game more people need to buy this it's like an old school arcade game. With a modern flavor.. I would love to co-op this with someone.. Great, relaxing game. Exercises the mind and addicting!. This game is great i enjoy the hell out of it the only issue is they need to add more maps like hellscape so many secrets and hidden places way more fun then just playing tag on other maps like yule.. This game doesn't need reviews, it needs a statue.. *Damn, do they expect me to call my doctor?*

Didn't even show correct answers!. Really fun game if u wanna just sit there and play and have a laugh with your friends this is the game for you

. I hate this game.

There's no real challenge to it. It's not a puzzle game.. This is a great riff on the space arcadey shooter genre. The gameplay is solid and quite difficult (but I'm not very talented either). The cool variation that sets this apart is the fact that you can trick out your ship with assorted shields, drones, weapons and decoys. You progress through a campaign where you'll need to consider your build out for the enemy you'll face. Recommended.

Pretty decent.

- The soundtrack is awesome.
- It needs more content, I'm selling all equipment and farming ambushes to lvl up.
- Started playing on epic from lvl one with the mage and you can lock almost any mob with normal attacks.. This game has a lot of potential, but there are a lot of bugs that make it unplayable and frustrating. If they ever get around to fixing things, it might be worth it.. This game is great, I really enjoy making strange creations, such as a Riding Lawn mower with a huge V8 on the front, and a browing machine gun.. I got this for 25% off, and after playing I think that's the correct price point, but I don't think you'll be disappointed at full price either.

The bullet time feature made the game for me. I have no reflexes to speak of, and hitting spacebar gives me plenty of time to assess the situation and hopefully make the right moves.

There are a lot of moves to make as you juggle speed, lane changes, weapon cooldowns, abilities, etc. Again, the bullet time (+ hotkeys) gives you time to think, and the decisions aren't that complicated. The missions have you do varied stuff to complete them (of course they all feature cars blowing up).

The game has crashed on me a couple times, so there's that.

So if you're old like me and want an action-y, explody, shooty game where you have time to decide what to do., this is it.. This collection is very entertaining if you play it as a straight time management game. However, if your goal is to "Gold Star" every level then this game becomes a challenging time management/puzzle hybrid. About a quarter of the way through each title (using Farm Frenzy 1 as an example) you realize that speed and accurate clicking alone isn't enough to earn the top prize. You also need to figure out what to buy, what to sell and when it's best to do each action, sometimes forcing you to make decisions that go against what appears to be the natural choice.. It have some bugs (not too much serious) but it's still a good game. Very fun! GJ Hiker!. this good game yeas. The game... the game is ridicuolusly difficult, some of the cuts are evn impossible to cut, and don't even get me started on the colours.
