what information is there, and 2. how much does it cost? Information Theory addresses these questions by studying probability, entropy, and coding. Probability quantifies uncertainty by assigning probabilities to possible states. Entropy quantifies the amount of uncertainty and can be thought of as a measure of the amount of information. Coding encodes information in a way that enables you to perform computations on it. This course will cover the basic concepts of probability, entropy, and coding, and apply them to study the basics of information theory. Throughout the course you will be asked to develop and apply intuition for the basic concepts that information theory deals with. Although probability is the primary focus of this course, the concepts of entropy and coding are also covered, which will give you the necessary background to study the more advanced concepts of information theory. A quick google search of "harness weight" shows that a lot of you are making errors. 1. Lets say

a person wants to walk all day and then go on a hike. a. Mule and horse weight is usually around 400 pounds. b. Narrow girths and midsections of western saddles weigh more than the saddle itself. c. Saddles for horses, ponies, etc are usually made of leather that the animal can eat and grow out of. d. It doesn't matter how much weight the "back" of the saddle adds. e. If it looks like a mule or horse and it sounds like a horse or mule, it's a mule or horse. 2. SADDLE WEIGHT a. Off and on the whole year depending on how the animal is being used. b. I ride 20 miles once a week and walk/hike the rest. I don't want to look like a mule or horse. c. I ride a heavy mule, the saddle is the heaviest part of the animal and adds around 50 pounds to my weight. d. I'm usually in the saddle 20 to 30 hours a week. I ride a beautiful light mule, with a Western "English" saddle. e. I have ridden a mule for 12 years and I weigh around 300 pounds, while they have ridden for 3 years. 3. My saddle is on a 700-800 pound mule. I'm 45 years old, 5'7" tall and I ride with a cinch and hand grips on a English 82157476af
